New Fixed Asset Management Outsourcing Service Launches

Fixed Asset Consulting, LLC (www.fixedassetconsulting.com) launches new outsourced service for companies that lack the in-house resources or expertise to navigate complexities of fixed asset management.

EUGENE, OREGON – December 3, 2012 – [Fixed Asset Consulting, LLC](http://www.fixedassetconsulting.com), a specialized consulting firm led by noted Fixed Asset Management expert Angie Bolton-Lyons, has announced the launch of its new [Fixed Asset Outsourcing](#) service. The new offering solves accounting and compliance concerns for companies who lack the in-house resources or expertise to navigate the complexities of Fixed Asset management.

According to Bolton-Lyons, the new fixed asset outsourcing service fills a huge gap in an underserved market. “There aren’t many fixed asset outsourcing options out there and even fewer with the level of experience that we offer. At a recent tax accounting conference, every CFO I spoke with said the same thing about their fixed asset management process: it’s a mess.”

After providing [fixed asset consulting](#) and technology solutions for nearly 20 years, Bolton-Lyons notes that for some companies, knowing **how** to manage fixed assets isn’t enough. She says, “Many of our clients also need someone to take control of and ‘own’ the process itself – reconciling assets, creating depreciation calculations and journal entries, and generating reports for state and federal requirements. That’s where the new outsourcing service comes in.”

The new Fixed Asset Management Outsourcing service begins with cleaning up and organizing existing fixed asset data, followed by:

- Generate depreciation schedules and fixed asset registers
- Generate reports for book, state, and tax purposes
- Create journal entries for general ledger postings and reconcile back to financials
- Provide tools and processes for tracking new fixed assets and disposals moving forward
- Provide year-end audit support including Form 4562 and other documentation for tax purposes

The most convincing argument for outsourcing fixed asset management goes beyond compliance or convenience. Bolton-Lyons also points out that the ROI is tremendous. “When clients see how much time and money we help them save, they’re convinced. In most cases, we’re able to accelerate deductions and generate more allowable expenses, all while reducing their administrative overhead. They also appreciate the peace of mind that comes from knowing their fixed asset accounting is accurate and compliant with current tax code.”

Fixed asset outsourcing is available on a monthly or quarterly basis and starts as low as \$89 per month depending on the number of assets to be managed. Bolton-Lyons says, “We’ve set a low barrier to entry and are providing businesses with an option they may not have considered or even known about. You can simply go on with your daily business activities and still get the benefit of expert fixed asset management at a price that’s extremely affordable.”
