

Creative strategies. Serious results.™

## COMPANY OVERVIEW

Fixed Asset Consulting is a unique and highly specialized consultancy dedicated to helping medium and large organizations get the most from their fixed asset accounting practices. Our experienced professionals have over 50 years of combined experience helping companies like Siemens, Berkshire Hathaway, Hospital Corporation of America, and Nike optimize fixed asset accounting and management practices to drastically reduce close timelines, eliminate errors, and save millions in depreciation and insurance expenses.

## WHAT SETS US APART: OUR TEAM

Fixed Asset Consulting distinguishes itself from other fixed asset accounting advisory firms primarily due to its founders, Angie Chase and Jason Johnson. Angie is a trailblazer and visionary, continuously devising ingenious strategies to enhance an accounting discipline as timeless as accounting itself. With 25 years of experience, she has successfully demonstrated to global brands how to transform fixed asset accounting into a lucrative profit center. Moreover, Angie has collaborated closely with Sage Software, ensuring that their Fixed Asset Software incorporates the necessary features to make these cost-saving innovations accessible to all users.

Jason kickstarted his career at KPMG, where he honed his expertise in building state-of-the-art, automated costing models that generated millions in savings for the US Department of Defense. Throughout his professional journey, he spearheaded pivotal cost-saving initiatives for prominent entities such as NTT, Microsoft, and Avaya. As the CEO of MPulse Software, he played a pivotal role in propelling the company to the forefront of the CMMS/EAM market.

Together, Angie and Jason bring a wealth of experience and accomplishments to Fixed Asset Consulting, establishing it as a leader in the field. Their complementary expertise and outstanding achievements have positioned the firm at the forefront of innovation and efficiency in fixed asset accounting advisory services.

## SERVICES OFFERED

We offer four specialized services:

**Sage Fixed Assets Software (SFA) Implementation and Optimization**

**Capital Asset Lifecycle Process Enhancement**

**Construction-in-Progress (CIP) Improvement**

**End-to-End Fixed Asset Outsourcing**

### Sage Fixed Assets Software (SFA) Implementation and Optimization

As one of the rare Sage SFA consulting partners, Fixed Asset Consulting offers over half a century of Sage-based expertise. Specializing in Sage Fixed Assets Software, we've identified that 90% of Sage users use less than 20% of its potential. This underutilization leads to missed opportunities, inefficiencies, and overpayments in insurance and taxes amounting to millions. Even for corporations with over \$10 billion in fixed assets, we swiftly pinpoint and execute potent SFA strategies to boost your bottom line.

### Capital Asset Lifecycle Process Enhancement

Revitalize your capital asset management with our targeted review, process enhancement, and strategic goal setting. Complex capital lifecycle processes can spiral out of control. We offer proven solutions, tried and tested at some of the world's largest asset-heavy businesses, to regain control and generate significant savings. Our method begins with a rigorous analysis of your current procedures, identifying and addressing risks, inefficiencies, and procedural gaps. We harmonize your data management across all interfaces and create a targeted action plan for process improvement, standardization, and automation. We introduce superior solutions, system integrations, and approval workflows. To ensure lasting success, we update your policies, train your team, and remain committed to driving measurable progress towards your goals.

### Construction-in-Progress (CIP) Management

Navigating the intricate landscape of Construction-in-Progress (CIP) management, particularly within the realm of fixed asset accounting, demands specialist expertise. Fixed Asset Consulting is dedicated to empowering your business with proven strategies that simplify CIP complexities and foster reliable, efficient processes.

### End-to-End Fixed Asset Outsourcing

Lean on our expertise. We can manage your entire fixed asset accounting process end-to-end, from the initial onboarding stage right through to year-end reporting and audit support. Our comprehensive service offering ensures seamless and efficient fixed asset accounting, empowering you to focus on your core business while we handle the complexities of asset management.

- **Onboarding:** We convert and reconcile your fixed asset sub-ledgers into the Sage Fixed Asset system, rectifying any errors for a smooth transition.
- **Monthly Activity:** We meticulously manage asset database updates and run regular depreciation reports in accordance with your reporting cycle.
- **Reporting:** We provide a comprehensive range of batch reports, ensuring accuracy through a rigorous reconciliation process before uploading.
- **Year-End and Audit Support:** Our year-end services include tax reporting, reconciliation, adjustment histories, and crucial tax forms. We also offer advice on asset breakdown and cost segregation.
